BHUMIKA

Computer Science Engineering Student | Software Development | MERN Stack | Python

Bathinda , Punjab, India • +91 7901944900 • abhumika354@gmail.com • https://github.com/abhumika354-cmd

PROFESSIONAL SUMMARY

Computer Science Engineering student with a strong foundation in C, C++, Python, and JavaScript. Currently learning and building projects using the MERN stack, including MongoDB, Express.js, React.js, and Node.js. Familiar with REST APIs, JWT authentication, Git/GitHub, and responsive UI development. Developed academic and personal projects in student evaluation, career portals, machine learning, and Python GUI applications. Eager to learn new technologies and seeking an internship opportunity to apply and strengthen my technical skills.

TECHNICAL SKILLS

Programming: C, C++, Python, JavaScript
Web Development: HTML, CSS, React.js, Node.js, Express.js, MongoDB, REST APIs, JWT Authentication
Machine Learning: TensorFlow, OpenCV, NumPy, CNN, Data Preprocessing
Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Operating Systems (OS), Computer Organization & Architecture (COA)
Tools: Git, GitHub, VS Code, Tkinter

PROJECT EXPERIENCE

Student Evaluation System | MERN Stack(Team project)

- Built a full-stack student evaluation platform using MongoDB, Express.js, React.js, and Node.js.
- Implemented role-based access for Admin, Teacher, and Student with JWT-based authentication and authorization.
- Developed teacher and student dashboards for grades, subject-wise remarks, attendance trends, and performance analytics.
- Created REST APIs for CRUD operations on student records, subjects, and evaluation data; used Git/GitHub for version control.

SkillSync – Student Career Portal | MERN Stack

- Developed a full-stack career portal connecting students with jobs, internships, and career resources.
- Implemented user authentication, job listings, internship applications, resume upload, and company profiles.
- Built responsive React.js interfaces and REST APIs with Node.js and Express.js; stored application data in MongoDB. **Brain**

Tumor Detection System | Python

- Developed a CNN-based deep learning system to classify brain MRI images as tumor or non-tumor.
- Used TensorFlow, Keras, OpenCV, and NumPy for model development, image processing, and data preparation.
- Applied preprocessing, augmentation, and normalization techniques and created a user interface for image upload and prediction.

Student Internal Marks Calculator | Python

- Built a Tkinter desktop application to calculate weighted internal marks from attendance, assignments, quizzes, and practicals.
- Added input validation and clear result output to help students estimate and track internal performance.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science Engineering | Maharaja Ranjit Singh Punjab Technical University (MRSPTU), Punjab
2024 – 2028 (Expected)

ACHIEVEMENTS & COMPETITIONS

- Participated in inter-college technical competitions and coding contests at MRSPTU.
- Competed in programming challenges covering Data Structures, Algorithms, and problem-solving.
- Participated in hackathons and project exhibitions; presented student-focused software projects.

CERTIFICATIONS & TRAINING

- MERN Stack Web Development (Basics) – Self-Paced Full-Stack Development Training
- Programming Fundamentals in C/C++ – Core Programming Training
- Git & GitHub for Beginners – Version Control and Collaborative Development
